FIGURE 9

A graph on a 10x10 grid. The x-axis and y-axis both range from 0 to 10. A curve is plotted starting at the point (5, 5), which is marked with a black dot. The curve rises to a peak at (6, 6) and then descends, ending at the point (10, 5).

A graph of the function $y = x^2$ for $x \geq 0$. The curve starts at the origin (0,0) and increases as it moves to the right, passing through the point (1,1). The x-axis is labeled with 0 and 1, and the y-axis is labeled with 1.
